HTS 2000 available

ABSTRACT: The newest version of the US **Harmonized Tariff Schedule**, **HTS** 2000, is now available for use by importers. The document provides everything you need to know in order to classify **goods**, but its complexity is daunting to all but the most experienced importers. Most of the changes in **HTS** classification and duty rates reflect staged duty reductions that are mandated by such multilateral trade...

TEXT: The newest version of the U.S. **Harmonized Tariff Schedule**, **HTS** 2000, is now available for use by importers,

The massive document - the 1999 version checked in at 1534 pages - provides everything you need to know in order to classif, **goods** but the sheer complexity of the thing is daunting to all but the most experienced importers. Mistakes in classifying **goods** are by far the most common reason that importers fail to comply with U.S...

... most of those mistakes can be traced to a lack of understanding of how the **HTS** works. A long-overdue simplification of the **HTS** is under way at the U.S. International Trade Commission but it won't be finalized for a few more years at least.

The current **HTS**, like its predecessors, reflects changes in classification of **goods** for purposes of duty and **tariff** assessment.

Craig Houser, a **tariff** expert with the ITC office of **Tariff** Affairs and Trade Agreements, said the preface of **HTS** 2000 explains the character of the changes that are reflected in the new document...

... the back of the document that indicates the new item classification numbers, said Houser.

The **HTS** was enacted by the Omnibus Trade and Competitiveness Act of 1988, and was first published in 1989 as a replacement for the **Tariff** Schedule of the United States. The International Trade Commission maintains and publishes the **HTS** and is charged with keeping it up to date and in conformity with the Harmonized Commodity Description and Coding System, an international format for classifying **goods** that was developed by the World Customs Organization.

Houser said that the **HTS** is published annually or as needed to reflect changes in the **tariff** schedule, and supplements are added on an as-needed basis. Unless importers are familiar with...

...other and how they can be applied practically.

"I have a good understanding of the **HTS** so I can look for changes in the areas that apply to me," he said...

... and gets more exacting as searches are refined and narrowed down to specific categories of **goods**. For example, if an importer was looking to classify integrated circuits, he or she would...

...by looking for categories such as gender or constituent material. Most of the changes in **HTS** classification and duty rates reflect staged duty reductions that are mandated by such multilateral trade...

... tool that makes it easier for importers to calculate duty rates is a searchable ITC tariff database that can be accessed through both the Customs and the ITC websites. The **database** allows importers to access ad valorem equivalent **tariff** rates for categories of **products** that have complex formulas for arriving at duty rates. The **database** also lists some **products** that are eligible for **tariff** preferences under special programs and includes trade data on some categories of **goods**. The ad valorem rates provided by the **database** are advisory only; importers still must consult the **HTS** for official duty and **tariff** rates.

HTSUS 2000 can be ordered from the Government Printing Office or downloaded from the...

... Expect lengthy download times unless you have access to high-speed internet connections.

Next week: **HTS** Simplification

Import /Export Logistics covers all logistical and **shipping** aspects of global trade that affect your bottom line. Please forward questions, suggestions and concerns to the author at inexdb@crocker.com or to **Import /Export** Logistics in care of Traffic World, 1230 National Press Building, Washington, DC 20045.

... hidden costs associated with international buying and selling, such as duties and taxes, insurance and **shipping**.

Anthony Awaida, chief executive of Xporta, a California-based software company that provides immediate information...

...said.

Calculating the landed cost of importing or exporting has always been the responsibility of **export -import** managers who are experts on these issues. Now sales or procurement staff need this information...

...don't have that expertise, so they pick up the phone and liaise with the **export -import** manager, which takes a lot of phone and fax contact," Awaida said.

The **import -export** manager usually has to calculate the international taxes and tariffs and allocate a Harmonised **Tariff** Schedule (**HTS**) number, an international code to classify **products** for duty purposes.

The allocation of an **HTS** code is a legal requirement and is a highly complex, and crucial, part of the...

...not wilful negligence, it's just that the information is not widely available and the **export -import** laws are so complex. They can't proactively track whether they have the right licence, if they have paid enough tax or if they are **shipping** to a prohibited area," Minahan said.

Non-compliance with international trade regulations is a serious...

...from a hefty fine, which can be up to five times the value of the **goods** exported, a revocation of export privileges or even a prison sentence.

Having accurate information in...

...be imperative for global ventures," Minahan said.

For vLinux, a Canadian B2B exchange for consumer **products**, investing in software to automate trade and **tariff** rates for international imports and exports was an effective way of gaining competitive advantage and rationalising operations.

Formed two years ago, vLinux offers Asian-produced **goods** to wholesalers and retailers in Asia and the North American continent.

"Importing and exporting **goods** is a quagmire of complexity and fraught with uncertainty," said Kombiz Eghdami, chief executive and...

...the final price by 40% of stock value.

"Finding all the duty, tax data and **HTS** codes was a practical part of logistics, but it was taking up too many resources," said Eghdami,

After considering trade facilitation **products**, vLinux invested in Xporta's Global Tradeware software.

Previously, vLinux had 17 people working in-house to determine the **HTS** number and calculating landed costs.

vLinux chose Xporta as it felt it could integrate quickly with existing systems and because of the integrity of Xporta's **database** for **HTS** product codes.

The software was delivered via vLinux's customer relationship management system and took...

...By typing in a simplified product definition, the Catalog Harmoniser software automatically assigns it an **HTS** code, an important sourcing and decision-support tool to the company.

... **Its Introduction of the First Real-Time Solution for Domestic and International Shipments of All Commodities**

...B2B) exchanges and e-marketplaces to quote, in real time, the total landed cost of **goods** delivered both domestically and internationally. With this product, Xporta is the only decision-support provider to offer an automated process that enables users to determine the Harmonized **Tariff** System classification using common names or descriptions. The breakthrough Harmonizer(TM) capability is the first...

... their businesses online, they are confronted with the complexities of world trade, which include varying **shipping** rates, taxes, duties and tariffs. Buyers now have access to new sources of supply but...

... holding inventory in every market is not an option. Companies must be able to supply **goods** rapidly from centralized manufacturing or distribution plants. Until now they have not been able to determine, without extensive expertise in worldwide logistics, the most advantageous **shipping** source and the final delivered cost needed to ensure profitability while remaining competitive.

Xporta Provides...

... price comparisons in real-time, which are needed to identify the best worldwide sources of **goods**. And it provides B2B exchanges with powerful value-added features to attract and retain customers...

... freight costs. ~~Its patent-pending technology~~ automatically determines the product classification according to the Harmonized **Tariff** System (**HTS**), an essential process to enable duty calculation but a process that previously required considerable expertise. It then calculates the Universal Landed Cost encompassing **shipping**, insurance, duties, taxes and a myriad of other potential charges.

"The Xporta solution differs from...

...by transportation providers.

Xporta Universal Landed Cost Created for B2B exchanges and companies involved in **import /export**. It provides the same capability for quoting international transportation costs as Transport Cost does for...

... Landed Cost also calculates the custom duties, taxes, and other entry charges associated with importing **goods** into the U.S. or other countries. It also contains access to Xporta's extensive and continually refreshed **database** of **tariff** schedules, duty rates, and other importation taxes and fees for the major trading nations of...

... or marketplaces that want to classify a large number of items according to the Harmonized **Tariff** System (**HTS**). As part of the Universal Landed Cost offering, Xporta has developed the patent-pending Xporta Interactive Harmonizer to help users classify **goods** according to the **HTS**. The breakthrough capability of the Harmonizer is that it enables users to search for classifications using common names or descriptions instead of the **HTS**, which are arcane and complex. This is the first and only solution that simplifies the...

... by delivering real-time Universal Landed Cost that accurately reflects the total delivered costs of **goods** transported both domestically and internationally, taking into account source, destination and routing. Through innovative integration of proprietary technology and partnerships with industry leaders, Xporta provides automated calculation of **shipping**, insurance, taxes, duties and other tariffs via a fully hosted and maintained solution. Xporta is...

Other Williams **products** include: 355/Loss/Damage Management Software. 356/MORATE. 357/Quik-Tariff. 358/Rates. 359/Shipment Documentation Program.

360/Match Pay. Distribution Sciences Inc. This program handles...

...following modules: freight rating, freight accrual, EDI, and correspondence utilities.

366/RatesAll. Rocky Mountain Motor **Tariff** Bureau. This program rates motor freight using an IBM or compatible PC. Discounts and accessorial...

...Pre- and Post-Audit.

376/Shippers System. TCS (Transportation Concepts & Services). This fully integrated microcomputer **database** system not only automates the various **tariff** rate structures, but also allows users to load and maintain their own **tariff** rates and charges for various modes. Modules include rate **database** control, interactive planning, B/L rating and shipment pricing, distribution planning, and shipment planning. The...

...retrieval, freight-charge calculations, and freight-rate addition, deletion, and monitoring.

Reebie markets several other **products**, including:

378/Freight Locator.

379/Ratemark/PC.

380/RCAM 3/PC (for rail carload costing...

...Rater. Southern Motor Carriers Rate Conference. Designed for the IBM PC, this program handles automatic **tariff** selection, multiple-level discounting, and rating. It incorporates 28 tariffs to date.

Other Southern Motor...Inc. These software models allow the user to optimize network flows of various types of **goods**, including distribution materials. The modules run on any microcomputer, minicomputer, or mainframe unit equipped with a FORTRAN compiler.

Other Insight **products** include:

391/Dispatch/Area Dispatch.

392/Micro-Dispatch.

393/National-Dispatch.

394/SAILS (Strategic Analysis...

...The system runs on IBM AT and compatible hardware.

Cleveland Consulting markets several other software **products**, including:

396/Optimal Consolidator (for load consolidation and route building).

397/Optimal Load Runner (for...

...and anticipated demand. The system operates on IBM S/38 and AS/400 hardware.

Other **products** available from IMREX are:

431/IMREX Cycle Count System.

432/IMREX Demand Forecasting.

433/IMREX...

...Resource Planning System. Management Science America (MSA)/Dun & Bradstreet Software (DBS). This system tracks finished **goods** through the distribution network to the end user. The program, which runs on IBM mainframes...

...management strategies, conducts multiple ABC stock analyses, and more.

MSA/DBS offers several other software **products**, including:

437/MSA Expert EDI.

438/MSA Forecasting System.

439/MSA Order Processing System.

Electronic markets several other **products**, including:

442/City Dispatch.

443/Claims Management.

444/Dial-Up Customer Service.

445/Dispatch & Dock...

...ANSI X12, TDCC, WINS, UCS, and virtually any other EDI standard.

Railinc offers several other **products**, including:

461/CLM Collection Services.

462/CLM/PC Tracing Software.

463/CRB/PC (for car...

...the mainframe and minicomputer environments. All transactions are defined in ANSI X12 format standards.

Other **products** available from EDI Solutions are:

466/EDImap (for applications interfacing).

467/EDIttran Application Interface Service...

...to handle large data volumes with speed, flexibility, and security.

Ordernet offers several other EDI **products**, including:

471/EDI Services.

472/Gentran.

473/IBM expEDite/36. IBM Systems Integration Div., Commercial...

...files that call on system macros to perform EDI functions.

St. Paul offers several other **products**, including:

475/Auto ID--Label.

476/Auto ID--SCAN.

477/Datatran.

478/InTouch EDI. Harbinger...their international freight. Although still few in number, these systems handle a wide variety of **import** / **export** functions, including documentation, duty-payment auditing, and freight-forwarder communications.

494/Drawback Management System. Dutycalc...

...2, and compatible hardware.

Dutycalc markets one other product:

495/Import Management System.

496/Harmonized **Tariff** Classification. MSR Inc. Developed to help Canadian shippers and customs brokers comply with the **Harmonized Tariff Schedule** requirements, this software helps users classify their **products** correctly. The system, which also provides access to official **tariff** information, operates on IBM PC and compatible hardware.

MSR markets several other software programs for...

...the financial, logistical, operational, and U.S. Customs-related activities involved in importing foreign-origin **goods**. It features nine fully integrated modules that automate the import cycle by generating purchase orders...

...auditing customs-duty payments, maintaining bank and vendor records, and providing management reports.

Other IMC **products** include:

502/Consolidator Management Controls (CMC).

503/Drawback Management Controls (DMC).

...America. This logistics-management system was developed to track and report on the status of **goods** purchased from vendors and then sold to customers in the United States and in foreign...

...forwarder transactions, ocean/airline information, customs-broker activities, and equipment control.

Devcom offers several other **products** , including:

506/Export Documents.

507/Import Track.

508/Rate & Pay/Intl.

509/Routing Intl.

510...

...handles forecasting, order entry, purchasing, inventory, shipment planning, export documentation, and management information.

Several other **products** offered by Ulrich & Associates, including:

512/Broker Access.

513/EDI-Flex.

514/Forwarder Access.

DIALOG(R) File 148: (c)2001 The Gale Group. All rts. reserv.

... statistical codes and for other commercial uses. Each country using the HS has in its **tariff** and statistical code a nucleus identical to that in every other country.

The **Harmonized Tariff Schedule** of the United States and the 1988 Edition, Schedule B contain the core nomenclature. This...

...members of the International Union of Railway will use the HS. The International Chamber of **Shipping** is switching to the HS for freight tariffs in two trades, Europe/West Indies and...

...every country had its own unique, and mostly non-comparable, system of describing and coding **goods** for its own purpose. The HS transcends these differences.

The HS provides the potential for...

...in conformity with the HS. Therefore, both the export code and the U.S. import **tariff** align 100% through the first six digits. (See charts on pg. 38.)

This information will...

...Nations Statistical Office is pursuing the feasibility and user needs for establishing and maintaining a **database** on international trade statistics in terms of the HS.

The HS was developed for customs tariffs and **import /export** statistics, and also for freight tariffs, production statistics, and other commercial uses.

Cut transaction costs...

...their automated systems. Non-automated descriptions and codes are also being used on invoices and **shipping** documents. Some companies use the codes and descriptions in internal **parts** and model numbers. This significantly lowers the cost of transactions by reducing the need to reclassify, redescribe, and recode **goods** for different purposes.

The universality of the HS also provides a basis for the electronic

... directory are new, reflecting a commitment on the part of software vendors to develop innovative **products** and upgrade existing packages.

Although this year's guide does not presume to cover every...

...Order-processing systems help the user manage the entire order cycle, from order receipt to **shipping**. These programs typically generate invoices and interact with an accounts-receivable system, compile information on...

...for order processing in multi-user/multi-company environments. It performs customer credit checks, produces **shipping** reports by invoice, and processes freight and labor charges.

Other Bristol **products** include: 133/'Business' Inventory Control System. 134/Control. Cambar Business Systems. This program performs such...

...line access to customer information, billing and pricing data, sales information, and open-order and **shipping** -status reports. 145/PC Order Processing. Ossi Data Processing Consultants. This IBM PC-compatible software...

...only generates, schedules, and maintains sales orders, but also accommodates multiple ship-to addresses and **shipping** dates. The package, which manages billing, inventory control, and accounts receivable, also prints customer and...capabilities. These programs perform such activities as pricing, reorder notification, inventory valuation, and picklist and **shipping** -notice generation. The planning/forecasting modules use demand forecasting simulation or reorder-point/leadtime logic...

...stock options, and inventory branch and master information. It runs on DEC hardware.

Other Argonaut **products** include: 163/AIS Sales Order II System. 164/BOS/Inventory Control. BOS National. Maintaining stock...

...system is designed to perform various materials-management functions,

including purchasing, inventory control and evaluation, **goods** receipt, storage-bin location management, invoice verification, and materials requirement planning.

Other SAP **products** include: 185/RV System (for order processing/invoicing). 186/The R-2 System (for integrated...

...public warehouses (through two different versions of the software).

Professional Micro Systems markets two other **products** : 190/Pallet Pattern Calculator. 191/The Labor Reporter.

Distribution Center/Warehouse Management

The software programs...

...design, location selection, and stockmove management. DEC or HP 3000 computers are required.

Other Bakco **products** include: 198/Distribution & Financial Control Applications. 199/Conventional Warehouse Software System. Litton IAS. Stock/pallet...

...requirements of a distribution/warehouse environment, DCMCS manages a variety of functions, including receiving/putaway, **shipping** /replenishment, and inventory control. The software also offers management analysis and planning capabilities.

Several other **products** are available from Dallas Systems: 203/Distribution Center Assignment Monitoring System. 204/Distribution Center On-Board Terminal Application. 205/Distribution Center Order Processing System. 206/Fast-Ship (for producing **shipping** instructions). 207/Engineered Labor Standards Activities Management and Control System. Eric C. Baum and Associates...

...activities such as receiving, putaway, replenishment, trip planning, order selection, distribution planning, inventory control, and **shipping** . The system runs on IBM System/38 minicomputers as well as on IBM mainframes.

Exeter...

...designer to optimize pallet patterns, evaluate load stability, and determine loading and stacking strength of **shipping** cases. It is designed for DEC, HP, and IBM microcomputers.

Process Data offers several other...

...Integrated Automation. Written for the HP 3000 computer, this package handles receiving, putaway, replenishment, picking, **shipping** , and shipment documentation. It was originally developed for warehouses of less than 250,000 square...and IBM computers. The program, which accommodates bar coding, also handles space management and receiving/**shipping** activities. 238/Warehouse Master II. Howard Way & Associates. Order processing, inventory control, and stock/pallet...

...family of software, Transportation Management tracks and controls materials in order to ensure that finished **goods** move from plant to warehouse to distribution center on time and in the right quantities. To do this, the system oversees carrier, **shipping** -order, and load-planning functions.

Control Data's other software **products** include: 240/Distribution Planning. 241/Operations Control. 242/Product and Materials Management. 243/Purchasing. 244/ATM (Advanced Traffic Management). Advanced Microware. This menu-driven software program automates and audits **shipping** operations. The package, which permits the user to define rates and process shipments for an almost unlimited number of carriers, weighs shipments, provides ZIP-to-zone rate conversion, calculates **shipping** charges, selects the least-cost/fastest method of shipment, and more. 245/Business Logistics System...

...replenishment/purchasing, accounts receivable, and sales analysis. It operates on IBM mainframes.

Other Arthur Andersen **products** include: 248/Distribution Control System/38. 249/MAC-PAC/38 (for integrated manufacturing, distribution, and finance). 250/EPSS-Electronic Process **Shipping** Systems. CRS Systems Div.

EPSS is a complete outbound traffic-management and inbound purchasing-control system. Designed for air and highway shippers and receivers, this system prepares **shipping** documents; selects routes, rates, and carriers for each shipment; audits carrier invoices; and manages freight...

...scale. It runs on IBM AT and compatible equipment.

Optimal Decision Systems offers several other **products**, including: 252/Distance Plus. 253/MICRO-LMS (for logistics modeling). 254/Optimal Load Runner. 255/Optimal Pathfinder. 256/Regulation Scanning System. Regulation Scanning. This computerized **database** provides access to Title 49 CFR, the federal hazardous-materials transportation regulations. Hardware required is...

...Northern Railroad. This logistics-analysis software package identifies the transportation and inventory costs of various **shipping** options, allowing shippers to compare the costs of up to four alternative transportation modes at...

...manage railcar fleets, processes railcar-location messages and waybills to create a current fleet-activity **database**. It requires IBM mainframe hardware. 277/CATOC-Computer Assisted Transportation Operations Control. A Analysis Inc...

...Control. 284/Freight Billing. 285/Freight Settlement. 286/Fuel and Miles Tax Reporting. 287/Rate **Tariff**. 288/Vehicle Maintenance. 289/CFA Vehicle Maintenance Reporting System. Computerized Fleet Analysis. This software package...including preventive maintenance and warranty control, exception reporting, labor and productivity analysis, fluids management, and **parts** -inventory and purchase-order management. The system operates on IBM 4300 or larger computers.

Control...

...automate vehicle and equipment maintenance. The system--which includes modules that cover work orders, spare **parts**, preventive-maintenance scheduling, and more--operates on Unisys hardware. 316/MatchMaker/GDT. Geographic Data Technology...

...Mileage Inquiry System. 319/MileMaker. Rand McNally-TDM. MileMaker, the computerized version on the Household **Goods** Carriers' Bureau Mileage Guide, gives users access to official HHG mileages for freight-rating and ...inspection, dispatching, and managing settlements and adjustments. The program operates on Ultimate computers.

Several other **products** are available from Information Solutions: 348/DMAC (distribution management). 349/EMAC (equipment maintenance). 350/TMC...

...Trans-EAZ is a comprehensive for-hire fleet-management system that handles billing and rating, **tariff** maintenance, fuel and mileage reporting, and driver tracking and settlement. The program operates on any

...

...productivity management.

Freight-Rate Maintenance/Auditing

These software packages enable the user to maintain a **database** for shipment rating and freight-bill auditing. The auditing programs compare actual bills with optimum charges computed using the **database**. The systems then either authorize the payment of bills or pay them automatically. They report...

...shipments. It runs on IBM System 370, 30XX, 4300, and 9370 Series mainframes.

Other Comtrac **products** include: 384/Best Rate. 385/Carrier Assignment. 386/Consolidation Optimizer. 387/PC First Rate. 388...

...complete distribution-management and freight-bill-payment program. It operates on Digital hardware.

Other Williams **products** include: 391/FRATE (for LTL rating). 392/GRATE (for shipment rating). 393/Loss/Damage Management Software.

394/MORATE. 395/Quick-Tariff . 396/Shipment Consolidation. 397/Shipment Documentation Program. 398/Match Pay. Distribution Sciences Inc. This program...
